Create Property Master Flow

Client   **PropertyMasterSvc**   **KafkaQSvc**   **ESSvc**

Client → PropertyMasterSvc: **Property Master Request**

> Municipal employee posts a new property Master request using admin console

PropertyMasterSvc → PropertyMasterSvc: **validate Request Format**

> Request format validations like unique value, others

PropertyMasterSvc → PropertyMasterSvc: **business Validations**

> Busniess validations e.g. master could not be created due to some business reason

PropertyMasterSvc → KafkaQSvc: **Queue for further processing**

PropertyMasterSvc → Client: **create Property Master Response**

KafkaQSvc → PropertyMasterSvc: **persist Property Master**

KafkaQSvc → ESSvc: **createElasticSearchIndex**
